Welcome to the Climate Change Policy Networks Study

The Climate Change Policy Networks study seeks to understand how people and organizations work to shape climate change policy in Canada. The project is funded by the Canadian government, through a grant from the Social Sciences and Humanities Research Council (Grant number: F10-05404). This is a funding source that is available to academics (such as university professors), for conducting social science research.

Thank you for agreeing to participate in this survey!

We are surveying people from government, civil society (such as NGOs), business, consulting, academia, media, and the scientific community, in order to map out the process of climate change policy making. As you and/or your organization has been involved in climate change debates in Canada, we are very interested in surveying you about your (or your organization's) positions and activities relating to climate change.

Our study focuses in particular on social networks – the patterns of communication, and other types of interactions you have with other policy actors (such as organizations, and individuals). We will also ask about your (or your organization's) views about specific climate change policy issues and related topics.

Part of our survey involves a short interview (either in person, or over the telephone), and part involves this online survey questionnaire

I would like to emphasize, that participation in the survey is purely voluntary. You may decline to answer specific questions, and you may withdraw from the interview at any time.

If you have any questions, please feel free to contact me at 1-604-822-2363 or email tindall@mail.ubc.ca.

If you have any questions about your rights as a research participant, please contact the UBC Research Subject Information Line at 604-822-8598.

For technical questions about the survey, please e-mail: soci.climate.change.policy@ubc.ca, or call 604-822-9615

The names of individuals and organizations who participate in the survey will be kept confidential.

At the end of the survey you will be asked to provide your consent to participate in the study by clicking on the "submit survey" button. You can save the survey at any time and return to complete it at your convenience.

I believe you will find your participation interesting, and I hope that you will decide to participate in our survey.

Sincerely,

Dr. David Tindall, Principal Investigator, Associate Professor Department of Sociology

Email: tindall@mail.ubc.ca

Telephone: (604) 822-2363

Section 1. Perceptions of Climate Change(q01)

Below is a list of statements regarding the nature of global climate change as a phenomenon and as a policy issue. These issues are stated in a one-sided manner to allow for agreement or disagreement. Please choose the option that best reflects the level of agreement/disagreement in your group's typical policy stance with the issue as stated, or your own view if you are participating as an individual (from strongly disagree to strongly agree).

Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
0	0	0	0	0
0	0	0	0	0
0	0	0	0	0
0	0	0	0	0
0	0	0	0	0
0	0	0	0	0
	Disagree C C C	Disagree Disagree Disagree Disagree C C C C C C C C C C C C	Disagree Disagree Neutral O O O O O O O O O O O O O O O O O O O	Disagree Disagree Neutral Agree C C C C C C C C C C C C C C C C C C

Section 2. Activities(q02_01_03)

We are interested in the activities organizations undertake regarding climate change. Using the four response categories: often, rarely, never, or don't know, please indicate the level of effort your organization devotes to each type of activity regarding climate change. If you are responding as an individual (rather than as a representative of an organization), please respond with regard to your own activities or if an item is not applicable to you as an individual click on "Not Applicable". Research and Decision-Making

	No, never	Yes, rarely	Yes, often	Don't know	Not Applicable
1. Deciding upon climate change policy	0		0	0	
2. Providing expert information to decision-makers	0	0	0	0	0
3. Research on climate change issues	0	0	0	0	0

Section 3. Policy Positions(q03_01_06)

Next, we want you to think about the important national climate change issues that your group is considering. The table below states issues in a one-sided manner to allow for agreement/disagreement.

Please choose the option that best reflects the typical policy stance of your group on the issue, or your own view (if you are participating as an individual).

	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
Canada should aim for more ambitious domestic action to reduce emissions	0	0	0	0	0
Canada should take global leadership by boldly reducing its greenhouse gas emissions	0	0	0	0	0
3. The best way to cut greenhouse gas emissions is through voluntary action by Canadian industries	0	0	C	C	0
4. Emissions trading (cap and trade) could make a significant contribution to reducing greenhouse gas emissions in Canada	0	0	0	0	C
5. A federal carbon tax could make a significant contribution to reducing greenhouse gas emissions in Canada	0	0	0	0	C
Carbon offsetting could make a significant contribution to reducing greenhouse gas emissions in Canada	0	0	0	0	0
(q03_07_12)					
(q03_07_12)	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
7. Canada should expand nuclear power to cut greenhouse gas emissions		Disagree	Neutral	Agree	Strongly Agree
7. Canada should expand nuclear power	Disagree				
7. Canada should expand nuclear power to cut greenhouse gas emissions8. Canada should expand its use of natural gas to cut greenhouse gas	Disagree	0	0	0	C
 7. Canada should expand nuclear power to cut greenhouse gas emissions 8. Canada should expand its use of natural gas to cut greenhouse gas emissions 9. Canada should restrict mining and export of oil sands to cut greenhouse gas 	Disagree	0	0	0	C C
 7. Canada should expand nuclear power to cut greenhouse gas emissions 8. Canada should expand its use of natural gas to cut greenhouse gas emissions 9. Canada should restrict mining and export of oil sands to cut greenhouse gas emissions 10. Canada should enact and follow a 	Disagree C	OOO	OOO	0	CCC
 7. Canada should expand nuclear power to cut greenhouse gas emissions 8. Canada should expand its use of natural gas to cut greenhouse gas emissions 9. Canada should restrict mining and export of oil sands to cut greenhouse gas emissions 10. Canada should enact and follow a low-carbon economy plan 11. A low-carbon economy will be an 	Disagree C C	OOO	OOO	0	CCC

	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
13. Canada should set renewable energy targets at the Federal level	0	0	0	0	0
14. A strong, binding international agreement is necessary for effective global reductions in greenhouse gas emissions	0	0	0	0	0
15. Without strong commitments from the US, it makes little sense for Canada to reduce its own GHG emissions	0	0	0	0	0
16. Without strong commitments from China, it makes little sense for Canada to reduce its own GHG emissions	0	0	0	0	0
17. Canada should take strong action to reduce emissions regardless of other countries' actions	0	0	0	0	0
18. Canada should commit more international funding to reduce greenhouse gas emissions	0	0	0	0	0
19. Canada's role/proposals in the international negotiations (UNFCCC) are too ambitious	0	0	0	0	0
20. Carbon, capture storage for coal-fired power plants is necessary to meet both energy and carbon reduction goals	0	0	0	0	0

Page #6

- Communication Networks: Questions about your frequency of communication with different organizations and individuals.
- In the next question we will ask about your communication with different organizations and individuals.
- While the list continues over a number of pages, it should not take as long to complete this question as it might seem at first glance.
- If you/your organization has had no communication with a particular actor, you can either indicate this by clicking on "Never", or by leaving the row blank (the latter will save you time).
- Please note we identified the organizations and individuals that appear on the list by using a systematic sampling procedure. Actors were included because of their participation in particular policy processes, and/or because of their inclusion in national print news media. We expect that a number of organizations/individuals will be unknown to some respondents, and there may be some organizations/individuals that you are surprised are not on the list. This will likely be due to the sampling procedures we undertook.

		_		
 Section	4.	Comm	unication	Networks

The following question focuses your/your organization's communication with other organizations and/or individuals, which we call "policy actors." Please answer each question by putting a check mark in the relevant column, for each policy actor on the list. Please indicate important organizations or individuals who are not on the list by marking the "other" category, and then listing their names in the space at the bottom of each page.

Question 4. How frequently [do you] does your organization communicate with each of the following organizations or individuals? Please indicate your answer by checking one appropriate column. The organizations are grouped into categories below.

The column choices are as follows:

- 1. Never. (You may either click on 'Never' or leave the row blank.)
- 2. Occasionally (A few times a year.)
- 3. Regularly (More than a few times a year, but less than once a month.)
- 4. Often (Once a month or more often.)

4.01. Governmental Organizations (e.g. Bureaus, Departments, Agencies, Research Institutes, Funding Agencies, Courts, Public Corporations):

- Policy Network: Questions your perceptions about, and relationships with different organizations and individuals.
- In the next section we will ask 4 questions about your perceptions about the influence of different organizations/individuals, and about your/or your organization's relationship with different organizations and individuals.
- If you do not know the organization or individual, you can leave the row blank.
- If you do know the organization or individual, please answer as many of the 4 questions as are applicable. Multiple responses per row are appropriate here.
- Similar to the previous question about communication networks, while the list continues over a number of pages, it should not take as long to complete this question as it might seem at first glance.
- Also, similar to the previous question about communication networks, we identified the organizations and individuals that appear on the list by using a systematic sampling procedure. Actors were included because of their participation in particular policy processes, and/or because of their inclusion in national print news media. We expect that a number of organizations/individuals will be unknown to some respondents, and there may be some organizations/individuals that you are surprised are not on the list. This will likely be due to the sampling procedures we undertook.

Section 5. Policy Network		Section	5.	Policy	Network
---------------------------	--	---------	----	--------	---------

The following questions focus on your/your organization's relations with other organizations and/or individuals, which we call "policy actors." Please answer each question by putting a check mark in the relevant column, for each policy actor on the list. Please indicate important organizations or individuals who are not on the list by marking the "other" category, and then listing their names in the space at the bottom of each page.

Question 5.1. Which policy actors are especially influential in domestic climate change politics? Please indicate your answer by putting a mark after their names in column 1.

Question 5.2. Who are your or your organization's sources of expert scientific information about climate change? Please indicate your answer by putting a mark after their names in column 2.

Question 5.3. Please mark all the policy actors that have a strong influence you or your organization's stance related to climate change. Please put a mark after their names in column 3.

Question 5.4: With which other policy actors do you or does your organization collaborate regularly concerning climate change issues and politics? Please put a mark after their names in column 4.
